GOOD FOR
Heavy, compact cargo: tiles, granite, rice, sugar, metal parts, machinery, chemicals in drums or bags.

WATCH OUT
It fills up by weight before it fills up by space. Road weight limits in India and at destination may stop you from loading the full payload.

FLOOR AND WEIGHT
Floor tested for a forklift axle of 7,260 kg. Rule of thumb: keep heavy items to about 4.5 tonnes per running metre of floor.
